Cyber Crime and Safeguard

Role play and Visualization through Chart

Gist of Digital Social Awareness

One to one interaction with students on Cyber ethics

Presenting digital handling techniques

Demonstrating Device handling and cyber ethics

At APS Rakhmuthi, students of class 9 spearheaded an engaging Cyber Awareness Programme designed to educate younger students on the importance of safe online practices. This initiative unfolded in two distinct phases: the first phase targeted students from class 1 to 5, while the second phase focused on classes 6 to 8. The class 9 students creatively delivered their presentations through skits and role plays, making the learning process interactive and enjoyable. By utilizing relatable scenarios and characters, they effectively conveyed crucial messages about cyber safety, helping their peers understand the potential risks and responsible online behaviour. This program not only enhanced awareness among the participants but also fostered a sense of responsibility towards safe internet usage in the school community.
